

## **Alchemie Technology expands to open an advanced high-tech digital development facility in Cambridge, UK as part of ambitious growth plans**

Date: 17<sup>th</sup> May 2018

As part of our ambitious growth plans, Alchemie Technology Ltd has opened a digital technology development facility in central Cambridge. The facility offers a mix of office and advanced, hi-tech laboratory space in the heart of the UK's digital printing hub.

The Cambridge digital development facility marks an important step in Alchemie's strategic growth plans and offers the ideal base from which to deliver the next generation of inkjet inspired digital manufacturing technologies to enable industries of the future.

The new Cambridge development facility will focus on the development and production of our digital materials science platforms utilising liquids, solids and powders. These platforms enable our customers to create unique new products and achieve efficiencies in manufacturing of current products with less energy and materials.

Alchemie's technologies are being adopted globally by customers in diverse industries ranging from textiles, construction materials and electronics to foodstuffs, pharmaceuticals and medical devices.

As part of our expansion Alchemie is growing its technical team. We are currently looking for a range of highly motivated, ambitious individuals who are not afraid to push the boundaries of technology development and are motivated by a growing start-up environment.
